## 3M™ Wrist Strap Tester

The 3M Wrist Strap Tester 746 can be used to test wrist straps in a variety of situations, from daily testing in a production facility to periodic testing at remote sites or field service locations. This versatility allows the Wrist Strap Tester 746 to be the standard for all applications in your company.

The tester is supplied with an AC adapter, but it also contains a long-life lithium battery as back-up power for portable applications or during power failures. (A "battery" light notifies the user when the battery needs replacement.)

As with other 3M wrist strap testers, the unit is easy to use. It can test the entire wrist strap system while it is being worn, or it can test the individual components to isolate a fault condition.
