

Single Wire Continuous Monitors

Single wire continuous monitors offer the most cost-effective means for continuously testing the connection integrity of the entire ground loop including the person, the wrist band and the coil cord. By using new impedance sensing technology, adjustments and false alarms are virtually eliminated. This system is fully automatic and activates when a wrist strap is plugged into the unit. It provides a green light for safe condition and a red light and tone for unsafe condition. Units are powered and grounded by an AC adapter. Compatible with most standard wrist straps.

3M™ Continuous Monitor, Single Wire 1

3M™ Continuous Monitor, Single Wire 2

3M™ Continuous Monitor, Single Wire 3

Continuous monitors reduce production costs by virtually eliminating the time spent testing wrist straps. Further savings may be realized by reduced ESD damage from broken wrist straps. Continuous monitors indicate a failed wrist strap when the wrist strap breaks. A broken wrist strap that goes undetected may expose products to ESD over an entire shift.
