TEXAS TECHNOLOGIES QUALITY SYSTEM

Texas Technologies Quality System has been designed and organized to meet the quality needs of our customers. As distributors we rely greatly on the quality systems in place at our manufacturers' facilities.'

Our clean packaging products that we distribute are certified clean to the highest NASA, MIL and FED standards, or to the specifications of our customers. Each product is accompanied by a certificate of compliance (CoC) providing lot traceability for the material and our processes.

With these stated goals, we have audited our essential activities as follows:

- ◆ Full document control including obsolete document removal and document change requests.
- ◆ Full document control as it pertains to engineering and test change.
- ◆ Material handling guidelines for limited life span, raw materials and supplies.
- ◆ Established controls for all Customer or Government Supplied Properties.
- ◆ Standard Operating Procedures to control adequacy of all purchased material.
- ◆ Procurement documented to control articles, material and services.
- ◆ Established rejected material control and documentation.
- ◆ Written procedures for material corrective action system with vendors.
- ◆ Record and documentation system on all material received.

We invite our customers to visit our facility. Please review our website at www.texastechnologies.com.

If you have other questions that were not answered, please feel free to call me at (800)858-1379.
